## Manufacture of Plumbing & Roof Plumbing Products

The business has been operating for many years and specialises in the manufacturing of galvanised, colorbond and copper products for plumbing and roof plumbing. These products include flume products, casings, heater trays and gas related products. The above products are in stock in various sizes, however they can also be manufactured in custom sizes as needed. The customer base of the business includes plumbers, electricians, builders, roofing contractors and various other trade related businesses. As the business has been operating for many years, it has built up a clientele of repeat customers.

The staff includes a production manager who attends to most of the factory workshop matters. The owners, husband and wife both work part time in the business mostly in administration, sales and marketing activities.

Asking Price includes Vehicles, Plant and Equipment, Stock and Goodwill.

This is an excellent opportunity to acquire an established niche manufacturing business with an established customer base, experienced staff and a long standing reputation with customers. It could be an excellent "bolt on" for an aligned business with an interest in entering this field and adding to their current product offerings. It could also be suitable for someone wanting a stand-alone business which they could potentially grow and expand further as a handover is to be provided.

We have an Information Memorandum available which interested parties can have access to after signing a confidentiality form on our website. For further information contact the Zircom Office on (08) 9409 2266 or submit enquiry form.
